

Adjustment of F1 and F3 Cosiflor & TwinGo blinds

Step 1:

At the back of the bottom rail is a cord squeezed into the back of the rail.

Step 2:

Pull the cord out (it is approx. 15-20cm long).

Step 3:

At the bottom of the bottom rail is a screw

Step 4:

Loosen this screw (don't take it out completely).

Step 5: **UP**

To **decrease** the drop: pull the cord of the bottom rail (at the endcap) carefully up- you do have approx. 1-2cm.

Be careful not to pull the cord too much/with too much force to avoid any damage!

Step 5: **DOWN**

To **increase** the drop: pull the rail carefully down - you do have approx. 1-2cm.

Be careful not to pull the rail too much/with too much force to avoid any damage!

Step 6:

When you have reached the desired drop always fasten the screw again (as it holds the drop in place).

Step 7:

Store the cord into the back rail again (squeeze it between fabric & rail)
